## **Institutes of Oratory-**

Quintilian 2015-05-13 This is the first single-volume English translation of the "Institutio Oratoria," a treatise on all stages of the orator's education that was written in Latin under the emperor Domitian (81-96 CE) by the

Roman rhetorician and teacher Marcus Fabius Quintilianus, commonly known as Quintilian. In the course of twelve books Quintilian discusses the education of young children, rhetorical theory (including discussion of invention of arguments, arrangement, style, memory, and performance), literary

criticism and history, gesture, rhythm, the ethics of persuasion, and much more. It is a treatise that has had a profound influence on education from Late Antiquity through the Renaissance and into the present day. This translation is based on that of the Rev. John Selby Watson, originally published in 1856 in two volumes and now in the public domain. For this edition the editors have updated Watson's widely admired and already very readable translation to reflect 21st century usage. Several other editions of Watson's translation of Quintilian's "Institutes" are available, but these are unrevised scans (often of low quality) of out-of-copyright editions and usually include only half the work, even if the title states "in twelve volumes" (this designation is copied from the title page to Watson's original edition in two volumes). This completely re-typeset edition is the only edition of Watson's translation to include Quintilian's complete text in one volume.

## **of Speaking and Writing-**

Quintilian 2015-11-13 A contemporary approach to a classic text from one of ancient Rome's master educators Quintilian on the Teaching of Speaking and Writing offers scholars and students insights into the pedagogies of Marcus Fabius Quintilianus (ca. CE 35-ca. CE 95), one of Rome's most famous teachers of rhetoric. Providing translations of three key sections from Quintilian's important and influential *Institutio oratoria* (Education of the Orator), this volume outlines the systematic educational processes that Quintilian inherited from the Greeks, foregrounding his rationale for rhetorical education based on the interrelationship between reading, speaking, listening, and writing, and emphasizing the blending of moral purpose and artistic skill. A contemporary approach to one of the most influential educational works in the history of Western culture, this book provides access not only to translations of key sections of Quintilian's educational program but also a robust contemporary

framework for the training of humane and effective citizens through the teaching of speaking and writing.

**Quintilian and the Law**-Olga Eveline Tellegen-Couperus  
2003 The art of persuasion, as practised today in political debate as well as in the courts of law, has been developed in the rhetorical tradition, but its authors have disappeared from view. One of them was Quintilian, who wrote his *Institutio oratoria* at the end of the first century AD. This book is special because it

contains one of the fullest surveys of rhetorical insights ever written and because it has come down to us in its entirety. Quintilian's rhetorical system has been used in teaching rhetoric at universities since the Middle Ages. The purpose of 'Quintilian and the Law' is to reintroduce Quintilian's *Institutio oratoria* to modern readers, and to show that the topics discussed in it are still very much alive today. To that end, modern experts of law and rhetoric present their views on the *Institutio oratoria*, each dealing with one of the twelve books of which it consists. The authors were free to choose their own way of working, so that some books are described in their entirety, others are discussed from one particular point of view, and others still are treated only with regard to a particular section. In Roman times, the shortest way to a political career was by working in the law courts. There, one could acquire a reputation for having a thorough knowledge of the law and for being able to speak well in public. In his *Institutio oratoria*, Quintilian

not only formulated important insights in juridical argumentation, in the art of speech-writing, and in the performative aspects of advocacy, he also discussed the ethical problems involved. Because Quintilian larded his instructions with numerous examples from practice, his book takes us back into the Roman law courts and helps us experience their exciting atmosphere. The essays in this book reflect the wide range of subjects discussed by Quintilian. They deal with (one of) six themes: (1) the ideal orator in a historical perspective, (2) his education, (3) rhetoric and communication, (4) argumentation, (5) Roman law in the *Institutio oratoria*, and (6) emotions in the courtroom. However, in honour of its author, they are arranged in the order of the *Institutio oratoria*.

**The Lesser Declamations**-  
Quintilian 2006 The Lesser Declamations, dating perhaps from the second century CE and attributed to Quintilian, might more accurately be described as emanating from "the school of Quintilian." The collection--here made available for the first time in translation--represents

classroom materials for budding Roman lawyers. The instructor who composed these specimen speeches for fictitious court cases adds his comments and suggestions concerning presentation and arguing tactics--thereby giving us insight into Roman law and education. A wide range of scenarios is imagined. Some evoke the plots of ancient novels and comedies: pirates, exiles, parents and children in conflict, adulterers, rapists, and wicked stepmothers abound. Other cases deal with such matters as warfare between neighboring cities, smuggling, historical (and quasi-historical) events, tyrants and tyrannicides. Two gems are the speech opposing a proposal to equalize wealth, and the case of a Cynic youth who has forsworn worldly goods but sues his father for cutting off his allowance. Of the original 388 sample cases in the collection, 145 survive. These are now added to the Loeb Classical Library in a two-volume edition, a fluent translation by D. R. Shackleton Bailey facing an updated Latin text.

### **A Short History of Writing**

**Instruction**-James Jerome Murphy 2012 Short enough to be synoptic, yet long enough to be usefully detailed, A Short History of Writing Instruction is the ideal text for undergraduate courses and graduate seminars in rhetoric and composition. It preserves the legacy of writing instruction from antiquity to contemporary times with a unique focus on the material, educational, and institutional context of the Western rhetorical tradition. Its longitudinal approach enables students to track the recurrence over time of not only specific teaching methods, but also major issues such as social purpose, writing as power, the effect of technologies, the rise of vernaculars, and writing as a force for democratization. The collection is rich in scholarship and critical perspectives, which is made accessible through the robust

list of pedagogical tools included, such as the Key Concepts listed at the beginning of each chapter, and the Glossary of Key Terms and Bibliography for Further Study provided at the end of the text. Further additions include increased attention to orthography, or the physical aspects of the writing process, new material on high school instruction, sections on writing in the electronic age, and increased coverage of women rhetoricians and writing instruction of women. A new chapter on writing instruction in Late Medieval Europe was also added to augment coverage of the Middle Ages, fill the gap in students' knowledge of the period, and present instructional methods that can be easily reproduced in the modern classroom.

**Higher Education in the Ancient World**-M L Clarke 2012-05-16 This volume provides an authoritative survey of Greek and Roman

education above the primary school level from the fourth century B.C onwards. Special attention is given to the teaching of philosophy, and there are also chapters on the liberal arts, in particular grammar and rhetoric, and on professional education. School organization, teaching methods and the impact of Christianity and the Church as an educational institution are all discussed. The picture that emerges is one of an established educational system which continued for centuries with little change and survived even the challenge of Christianity.

### **The Orator's Education:**

**Books 3-5**-Quintilian 2001  
Quintilian, born in Spain about 35 CE, became a widely known and highly successful teacher of rhetoric in Rome. The Orator's Education (Institutio Oratoria), a comprehensive training program in twelve books, draws on his own rich experience. It is a work of enduring importance, not only for its insights on oratory, but for the picture it paints of education and social attitudes in the Roman world. Quintilian offers both general and specific advice. He gives guidelines for proper schooling (beginning with the

young boy); analyzes the structure of speeches; recommends devices that will engage listeners and appeal to their emotions; reviews a wide range of Greek and Latin authors of use to the orator; and counsels on memory, delivery, and gestures. Donald Russell's new five-volume Loeb Classical Library edition of The Orator's Education, which replaces an eighty-year-old translation by H. E. Butler, provides a text and facing translation fully up to date in light of current scholarship and well tuned to today's taste. Russell also provides unusually rich explanatory notes, which enable full appreciation of this central work in the history of rhetoric.

Aristotle to Cicero and beyond Classical rhetoric is one of the earliest versions of what is today known as media studies. It was absolutely crucial to life in the ancient world, whether in the courtroom, the legislature, or on ceremonial occasions, and was described as either the art of persuasion or the art of speaking well. This anthology brings together all the most important ancient writings on rhetoric, including works by Cicero, Aristotle, Quintilian, and Philostratus. Ranging across such themes as memory, persuasion, delivery, and style, it provides a fascinating introduction to classical rhetoric and will be an invaluable sourcebook for students of the ancient world. **Papers on Quintilian and Ancient Declamation-**  
Michael Winterbottom  
2019-04-04 Declamation - the practice of training young men to speak in public by setting them to compose and deliver speeches on fictional legal cases - was central to the Greek and Roman educational systems over many centuries and has been the subject of a recent explosion of scholarly interest. The work of Michael Winterbottom has been seminal in this regard, and the present volume brings together a broad selection of his scholarly articles and reviews published since 1964, creating an authoritative and accessible resource for this burgeoning field of study. The assembled papers focus on two related topics: the rhetorician Quintilian and ancient declamation in practice. Quintilian, who taught rhetoric at Rome in the

second half of the first century AD, was the author of the *Institutio Oratoria*, a key text for Roman educational practice, rhetoric, and literary criticism. Subjects explored in the present collection range widely over not only the establishment and interpretation of the text and its literary and historical context, but also Quintilian's views on inspiration, morality, philosophy, and declamation, of which he was a practitioner. While the volume also offers detailed examinations of the texts and interpretations of a wide range of Latin and Greek authors of declamations, such as Seneca the Elder, Sopotros, and Ennodius, there is a particular focus on two collections wrongly attributed to Quintilian, the so-called 'Minor' and 'Major Declamations'. A major re-assessment of the manuscript tradition of the latter collection is published here for the first time.
